

Pierre Le Nestour

Senior Software engineer

Brighton, UK | [07774 176010](tel:07774176010) | twogrouptheory@gmail.com | [GitHub](#) | [LinkedIn](#) | Full UK Right to Work | Can work remote in Eastern Time Zone, UTC-5

ABOUT ME

Senior full-stack engineer with a proven track record delivering web platforms, SaaS products, and enterprise applications across startups, agencies, and international organisations.

Strong expertise across **TypeScript, React, Node.js, Python, Django and cloud infrastructure**. Experienced in taking ownership of products end-to-end, from architecture and implementation to deployment and operational support.

Comfortable working autonomously in fast-moving environments, leading small engineering teams when needed, and delivering pragmatic solutions with a strong product focus. Uses modern **AI-assisted development tooling** as part of day-to-day engineering workflows.

KEY SKILLS

- **Frontend:** TypeScript, React, Next.js, React Native, Redux, MUI, Bootstrap, Tailwind
- **Backend & APIs:** Node.js, Express, Python, Django, DRF, Celery, Laravel, GraphQL, REST
- **Data & Storage:** PostgreSQL, MySQL, Redis, SQLAlchemy, Sequelize, Elasticsearch
- **Cloud & DevOps:** AWS (ECS, EC2, Lambda), Google Cloud Platform (GCP), Docker, CI/CD, Serverless
- **Methodologies:** Agile, Scrum, Technical Architecture, Team Mentorship, Code Reviews

EXPERIENCE

Yurtle, Remote — *Founding Engineer (Contract)*

February 2025 – December 2025 (11 month)

Took ownership of the product and engineering direction during the company's pivot from elder care services to the nursery insurance market.

Key achievements:

- Led full-stack development across **mobile**, frontend, backend, infrastructure, and deployment
- Used modern AI-assisted development tooling to support rapid iteration and delivery
- Repurposed the existing **React Native** platform and Node.js backend to support new insurance-focused business workflows
- Delivered production-ready features rapidly to support product-market fit validation
- Managed releases on app stores, deployment and infrastructure on Google Cloud

Claude Code / React native / ReactJS / Node / Next.js / Sequelize / MySQL / Google Cloud / React Admin / DevOps

Career break

2024 - 8 months

I took a sabbatical to cycle 11 000 miles across 15 countries in Europe. ([map](#))

Entertainment Partners, Remote — Full stack developer (Contract)

December 2022 – January 2024 (1 year 1 month)

Joined a Scrum engineering team delivering payroll and production finance software for the TV and film industry.

Contributed to the implementation of new business rules introduced through union negotiations and supported delivery across backend services, frontend applications, and serverless infrastructure.

Key contributions:

- Developed backend functionality using Python and Django
- Built React and TypeScript frontend features for enterprise users
- Integrated AWS Lambda functions into core workflows
- Worked within a distributed Agile delivery team
- Contributed to production-grade financial software used within the entertainment sector

Python / Django / Celery / Postgres / SQL Alchemy / AWS lambda / Typescript / React

LEO Learning, Brighton — Lead developer (Permanent)

July 2016 – October 2022 (6 years and 3 months)

Led delivery across multiple e-learning and web platform projects for global clients.

Progressed from Lead Developer to Software Engineering Team Lead while remaining hands-on across frontend, backend, infrastructure, and deployment.

Responsibilities included:

- Technical solution design and implementation
- Leading and mentoring development teams
- Code reviews and engineering standards
- AWS infrastructure and CI/CD management
- Authentication and identity integrations (OAuth, OIDC, SAML)
- Collaboration with clients, designers, QA, and product stakeholders
- Production support and technical troubleshooting

Selected Projects

- **BP (The Learning Campus):** Led 4 developers to build a unified React learning hub.
Lead team of 4 / TypeScript / React / MUI / Express / GraphQL / OIDC / Websocket with PubSub over GraphQL / jest
- **ThermoFisher:** Managed 3 developers integrating a custom Moodle and Laravel system.
Led team of 3 / PHP / Laravel / docker / EC2 / TNTSearch / Crystal - PHP API Wrapper
- **Deloitte:** <https://www.deloittefrslearning.com> Rapidly deployed a bespoke Django CMS learning platform within an aggressive 10-day window.
Team of 2 / Django CMS / postgres / Whoosh / pytest / Team of 2 devs
- **World Athletics (Olympics):** Led a team of 3 building a public-facing global e-learning application.
Led team of 3 / React / Express / GraphQL / Bootstrap - Python / Django / Django DRF / Moodle / PHP
- **Visa International:** Directed the team building a gamified, interactive React/SCORM product education app.
Led team of 3 / React / SCORM / Redux / Cornerstone / jest

22 point six, Burgess Hill — Senior developer (Permanent)

January 2015 - July 2016 (1 year 6 months)

Worked within a startup environment delivering web solutions for clients across multiple sectors.

Key contributions:

- Developed and enhanced an in-house CMS platform
- Supported deployments and client implementations
- Contributed to backend architecture and feature delivery

Symfony / PHP / PHPUnit / TDD

BDM Voice, Haywards Heath — Senior developer (Permanent)

July 2013 – December 2014 (1 years 5 months)

Worked within a small Agile engineering team delivering and maintaining a range of digital products.

Key contributions:

- Modernised legacy systems using Symfony and Doctrine
- Improved maintainability through adoption of PSR standards
- Increased test coverage with functional and unit testing
- Managed infrastructure, deployment, and security tasks

AngularJS / Symfony / PHP/ PHPUnit / Behat / Doctrine / DevOps / TDD

Earlier Experience, France

- **Technical project management support** – SFR (Vodafone group), Paris. Tech advisor on payment solutions coordinating dev teams in India and Germany.
- **Technical application management support** – RTE (EDF group), Paris,
- **Developer** – EDF, Paris – **C++ low latency** solution for the national electric grid
- **Developer** – CEA, Paris – **C/C++** industrial tools

EDUCATION

MSc Computer Science, Paris XIII University, France

LANGUAGES

English, French (native)
