Brighton, UK (Can work remote in
Eastern Time Zone, UTC-5)

ABOUT ME

Full-stack developer with a lot of experience with a different range of technologies, I have led teams in designing and building innovative solutions to assist businesses in achieving their goals.

More recently, I have used my expertise to steer **coding agents** to quickly deliver value to businesses.

I am curious, autonomous and value engagement and honesty.

Now seeking new contract opportunities in the UK (or remote UTC-5)

KEY SKILLS

Typescript / React / Node.js /
React Native / React Admin
GraphQL / Redis / Postgres

Docker / AWS (ECS - EC2 - lambda) /
Google Cloud

Python / Django / Django CMS / Django
Rest Framework / SQLAlchemy

Agile / Scrum / Atlassian suite

EXPERIENCE

Yurtle, Remote — *Founding Engineer (Contract)*

February 2025 – December 2025 (11 month)

Took in charge all aspects of the development to pivot from a solution to organize elder care to a more business oriented product addressing nurseries insurance market.

I repurposed the existing React native app and express backend to add insurance features, now Yurtle is equipped with an innovative solution that found its market.

Career break

2024 - 8 months

I took a sabbatical to cycle 11 000 miles across 15 countries in Europe. ([map](#))

[Bicycle](#) / [Tent](#)

Entertainment Partners, Remote — *Full stack developer (Contract)*

December 2022 – January 2024 (1 year 1 month)

Joined a SCRUM team to help implement the new rules defined by the negotiation with the union of the entertainment industry (TV/Film). Their product consists of a production finance solution built with Python, Django (TurgoGears) framework, a classic front end with React/Typescript, and few calls to AWS lambda functions.

LEO Learning, Brighton — *Lead developer (Permanent)*

July 2016 – October 2022 (6 years and 3 months)

LEO Learning provides e-learning content and services. I worked on the frontend and backend side of multiple projects, at first as a lead developer, then as a software engineering team lead.

My responsibilities:

- Estimates
- Technical solution design
- Code and lead the dev team
- Conduct the reviews
- Promote good practices
- Solve technical issues
- Hands on the AWS console
- Continuous integration and deployment (pipelines to ECS and EC2)
- Design and implementation of authentication mechanisms (Oauth, OIDC, and SAML)
- Support non-technical members

Some of the projects I have led:

- **BP - The Learning Campus:** Ecosystem of e-learning products unified into a single experience by the development of a React SPA.

TypeScript / React / MUI / Express / GraphQL / OIDC / Websocket with PubSub over GraphQL / jest / Team of 4 devs

- **American Institute of Certified Public Accountants :** Development of a tool (LTI) for an existing LMS (Learning Management System) to enhance its capabilities.

Typescript / React / MUI / Sequelize / GraphQL / lambda / PostgreSQL / BullMQ / jest / Team of 3 devs

- **ThermoFisher :** Creation of a learning management system with Moodle and a laravel application.

PHP / Laravel / docker / EC2 / TNTSearch / Crystal - PHP API Wrapper/ Team of 3 devs

- **Deloitte - <https://www.deloitteifrslearning.com>.** Django CMS site for Deloitte to provide the elearning IFRS content to the public. The project has been developed, tested, reviewed, deployed and delivered in 10 days with a team of 2 devs.

Django CMS / postgres / Whoosh / pytest / Team of 2 devs

- **World Athletics - Olympics :** E-learning platform for officials, athletes and fans.

React / Express / GraphQL / Bootstrap - Python / Django / DRF - Moodle / PHP

- **Visa International :** To gamify the learning of VISA products, we created a highly interactive React based SCORM application.

Team of 3 dev / React / SCORM / Redux / Cornerstone / jest

- **Fidelity International :**Creation of a scheduler to award badges to learners.

Django CMS / Kroniker / Bootstrap

- **Moodle development :** Creation and maintenance of multiple sites.

PHP / PHPUnit

22 point six, Burgess Hill — Senior developer (Permanent)

January 2015 - July 2016 (1 year 6 months)

Technology start-up focused on web solutions.

- Creation of an in-house CMS based on CMF project
- Deployment and enhancement of the solution for clients

BDM Voice, Haywards Heath — Senior developer (Permanent)

July 2013 – December 2015 (2 years 6 months)

Small team of two developers working agile from design to market of a large range of products.

In charge of all the tasks from the development to managing the infrastructure (Digital Ocean) or DevOps tasks (security/deployment).

I worked on a variety of products, bringing modernisation to improve maintenance and resilience to change, in particular:

- Moved legacy code to Symfony/Doctrine following modern standards (PSR)
- Covered the code with functional and unit test

[AngularJS](#) / [Symfony](#) / [PHP](#) / [PHPUnit](#) / [Behat](#) / [Doctrine](#) / [DevOps](#)

Previous Role, France

- **Technical project management support** – SFR (Vodafone group), Paris. Tech advisor on payment solutions coordinating dev teams in India and Germany.
- **Technical application management support** – RTE (EDF group), Paris,
- **Developer** – EDF, Paris – [C++ low latency](#) solution for the national electric grid
- **Developer** – CEA, Paris – [C/C++](#) industrial tools

EDUCATION

MSc Computer Science, Paris XIII University, France

LANGUAGES

English, French (native)
